This game is really similar to hitman as you can imagine and it is twice as hard as hitman so if your looking for a challenging stealth game then this is for you only buy it when its on sale get the gold pack when it only cost 3\$:3. ITS NOT ON WINDOWS 8 PLATFORM AND I HAVE ACCIDENTALLY BOUGHT IT IT SUCKS!!!. These controls are clunky, I had to fight with them just to loot the starting house. Then when I went on the street I was swarmed with zombies that I could not avoid or turn fast enough to shoot back at. Overall I feel like burning \$4 would have been more fun.. \udb4\udc21. it's not a fast game, takes awhile to get every thing built up enough, then you can go out and have a crack, but it does take time to build stuff. I enjoyed my time with this game. I wasnt too familiar with the rules of Golf before playing this but the Golfing is pretty simplistic. I liked the way the charcter stats affect your golf game. it plays like an action RPG. there are some secrets to be found I found a few of them but I suspect not all of them. I bought this for 1.50 USD during the summer sale and having played it Id happily pay more for it.. How do I open this on a Mac, lol??

Really bad popup and fog, AI is really dumb. 3/10. it has horrid gameplay you need more than a few weapons i hate that you only get a pistol and a rifle and the only other weapon is grenades it sucks. 1/10. idk what the ♥♥♥♥ is this game about. Not recommended as it's a mediocre single-player game only, no multiplayer whatsoever. Buy other Unreal games instead. Vomit Simulator

Its good when you're in control and flying, but this is the first game that made me motion sick. I don't get sick that easily, but the controls on this game I could not figure out... which led to my helmet-dude wildly rocketing all around the tutorial rooms.. A 2D shooter with precise control, a good old game mode and the right weapons and support items.

A game to have fun with. if you like something like that. :)
