About This Game

Tet VR is a fast paced, puzzle game designed for VR touch.

With multiple game types to pick from you choose how casual or hectic to make the game.

Tet VR is a puzzle game that's made accessible and intuitive for all ages.

Touch controls make that possible because it transforms your hands into the controllers which means that playing the game is as easy as grabbing a block, twisting it in place, and dropping it down.

Tet VR is a work in progress and pre-release. Leaderboards as well as online multiplayer are currently WIP with locally hosted servers for Co-Op or Versus.

Also planned are larger content updates with completely new game modes that use tetromino blocks in unique ways.

If you have questions, comments, or just want to get in touch, you can comment or post on my Subreddit. I'm active on the Subreddit so if you post, I will see it and I will reply.
